Reliance Spinning Mills Ltd.

Significant Accounting Policies and Notes to Financial Statements

For the period ended Poush 29, 2081

1 General Information

Reliance Spinning Mills Ltd. is a public limited company domiciled in Nepal. The Registered Office of company is at Kamladi -28, Kathmandu Metropolitan (Nepal). The date of incorporation of the company is on 28th Day of Baishakh, 2051 vide Registration No. 105117/50/51.

The company's principal activity comprises of manufacturing of yarns. The manufacturing facility of the company is located at Khanar & Duhabi, Sunsari.

2 Basis of Preparation

The financial statements comprise the Statement of Financial Position, Statement of Profit or Loss and Statement (including Other Comprehensive Income), the Statement of Changes in Equity, the Statement of Cash Flows and the Notes to the Accounts.

2.1 Statement of Compliance

The Financial Statements have been prepared in accordance with Nepal Financial Reporting Standards (NFRS) as published by the Accounting Standards Board (ASB) Nepal and pronounced by The Institute of Chartered Accountants of Nepal (ICAN) and other accepted accounting principles.

These policies have been consistently applied to all the years presented except otherwise stated.

2.2 Functional and Presentation Currency

The financial statements are presented in Nepalese Rupees (NPR) which is the Company's functional currency.

2.3 Use of Estimates, Assumptions and Judgements

The Company, under NFRS, has applied accounting policies which appropriately suit its circumstances and operating environment. Further, the Company has made judgments in respect of items where the choice of specific policy, accounting estimate or assumption to be followed could materially affect the financial statements. This may later be determined that a different choice could have been more appropriate.

The accounting policies have been included in the relevant notes for each item of the financial statements and the effect and nature of the changes, if any, have been disclosed.

The Company has made estimates and assumptions that will affect the assets, liabilities, disclosure of contingent assets and liabilities, and profit or loss as reported in the financial statements. The Company applies estimates in preparing & presenting the financial statements and such estimates and underlying assumptions are reviewed periodically. The revision to accounting estimates are recognized in the period in which the estimates are revised and are applied prospectively.

Disclosures of the accounting estimates have been included in the relevant sections of the notes wherever the estimates have been applied along with the nature and effect of changes of accounting estimates, if any.

2.4 Going Concern

The financial statements are prepared on a going concern basis, as the Board of the Company is satisfied that the Company has the resources to continue in business for the foreseeable future. In making this assessment, the Board of Directors have considered a wide range of information relating to present and future conditions, including future projections of profitability, cash flows and capital resources.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

2.5 Changes in Accounting Policies

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

2.6 Reporting Pronouncements

The Company has, for the preparation of financial statements, adopted the NFRS pronounced by ASB as effective on September 13, 2013. The NFRS conform, in all material respect, to International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

2.7 New Standards in Issue But Not Yet Effective

For the reporting of financial instruments, NAS 32 Financial Instruments, Presentation, NAS 39 Financial Instruments Recognition and Measurements and NFRS 7 Financial Instruments - Disclosures have been applied. NFRS 1 has been complied for the classification of Financial Instruments. A number of new standards and amendments to the existing standards and interpretations have been issued by ASB after the pronouncements of NFRS with varying effective dates. Those become applicable when ASB Nepal incorporates them within NFRS.

2.8 Limitation of NFRS Implementation

Wherever the information is not adequately available, and/or it is impracticable to develop , such exception to NFRS implementation has been noted and disclosed in respective sections.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

3 Significant Accounting Policies

3.1 Basis of Measurement

The financial statements have been prepared on historical cost basis except for the following material items in the statement of financial position:

- Financial assets other than measured at amortized cost are measured at fair value.
- Inventories are measured at cost or net realizable value
whichever is lower

3.2 Presentation - Current versus Non-Current Classification

The Company presents assets and liabilities in statement of financial position based on current/non-current classification. Based on the nature of products and the time between acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current/non-current classification of assets and liabilities.

The Company classifies an asset as current when it is:

- Expected to be realized or intended to sold or consumed in normal operating cycle,
- Held primarily for the purpose of trading,
- Expected to be realized within twelve months after the reporting period, or

All other assets are classified as non-current.

The Company classifies a liability as current when:

- It is expected to be settled in normal operating cycle,
- It is held primarily for the purpose of trading ,
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

3.3 Critical Accounting Estimates

The preparation of the financial statements in conformity with Nepal Financial Reporting Standards requires the use of certain critical accounting estimates and judgments. The management has exercised judgments in the process of applying the Company's accounting policies. The Company makes certain estimates and assumptions regarding the future events. Estimates and judgments are continuously evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual result may differ from these estimates and assumptions. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year primarily includes:

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

a) Recognition of Deferred Tax Assets

Deferred tax assets are recognised for taxable temporary difference to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

b) Provision for Depreciation and Amortisation

Depreciation and amortisation is calculated over the estimated useful lives of the assets. An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

3.4 Capital Management

For the purpose of the Company's capital management, capital includes issued capital and all other equity reserves attributable to the equity holders of the company. The primary objective of the company's capital management is to maximize the shareholder value. The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders or issue new shares.

3.5 Impairment of Non- Financial Assets (Excluding Inventories and Deferred Tax Assets)

Non-financial assets are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount (i.e. the higher of value in use and fair value less costs to sell), the asset is written down accordingly. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or Cash generating units exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

An assessment is also done for whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exist or may have been decreased. If any such indication exists the asset's recoverable amount is estimated. The carrying amount of the fixed asset is increased to the revised estimate of its recoverable amount such that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years.

Impairment loss or reversal shall be included in profit or loss if any. The company has no impairment loss/ gain during the relevant reporting periods.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

3.6 Foreign Currency Transactions

Transactions entered into by the Company in a currency other than Nepali Rupees (the currency of primary economic environment in which it operates) are recorded at the rates ruling when the transactions occur. Exchange differences arising on foreign currency transactions settled during the year are recognized in the Statement of Profit or Loss. Unsettled foreign currency monetary assets & liabilities are translated at the rates ruling at the reporting date. Exchange differences arising on the retranslation of unsettled monetary assets and liabilities are recognized immediately in profit or loss statement.

3.7 Lease

The Company as a Lessee:

The Company enters into an arrangement for lease of buildings and office equipment. Such arrangements are generally for a fixed period but may have extension or termination options. In accordance with NFRS 16 - Leases, at inception of the contract, the Company assesses whether a contract is, or contains a lease. A lease is defined as 'a contract, or part of a contract, that conveys the right to control the use an asset (the underlying asset) for a period of time in exchange for consideration.

To Assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- The contract involves the use of an identified asset - this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- The Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and

The Company assesses whether it has the right to direct 'how and for what purpose' the asset is used throughout the period of use. At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

Measurement and recognition of leases as a Lessee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses (unless such right of use assets fulfills the requirements of NAS 40 - Investment Property and is accounted for as there under), if any and adjusted for any re-measurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the Statement of profit and loss.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in Statement of profit and loss if the carrying amount of the right-of-use asset has been reduced to zero, as the case may be.

The Company presents right-of-use assets that do not meet the definition of investment property on the face of balance sheet below 'property, plant and equipment' and lease liabilities under 'financial liabilities' in the balance sheet.

The Company has elected not to apply the requirements of NFRS 16-Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term, unless the payments are structured to increase in line with the expected general inflation to compensate the lessor's expected inflationary cost increases.

The Company as a Lessor

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

The Company recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of 'other income'.

The Company recognizes lease payments received under operating leases as income on a straight-line basis over the lease term unless the payments are structured to increase in line with the expected general inflation to compensate the lessor's expected inflationary cost increases. In case of a finance lease, finance income is recognised over the lease term based on a pattern reflecting a constant periodic rate of return on the lessor's net investment in the lease.

3.8 Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the Government.

The Company recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the company's activities as described below. The company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specific of each arrangement.

Revenue is measured at the fair value of the consideration received or receivable net of trade discounts. Revenue include all revenue from ordinary activities of the company that are recorded excluding Value Added Taxes collected from customers that are remitted or are to be remitted to the government authorities.

(a) Sale of Goods

Revenue from sale of goods is recognized when the significant risks and rewards are transferred to the buyer by virtue of dispatch of such goods to the buyer after issuance of sales invoice.

(b) Other Operating Revenues

Export Incentives are recognised on accrual basis when no significant uncertainties as to the amount of consideration that would be derived and to its ultimate collection exist.

(c) Other Income

- Rental Income from Operating lease is recognised on straight-line basis over the tenure of the lease agreement, except for contingent rental income which is recognised when it arises and where scheduled increase in rent compensates the lessor for expected inflationary costs.
- Insurance claims are accounted for on acceptance or to the extent amount have been received.
- Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate.
- Income from write-back of payables is recognized under "Miscellaneous Income" when the obligation is extinguished and no longer required to be settled.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

3.9 Property, Plant & Equipment:

A) Recognition and Measurement

The cost of an item of property and equipment shall be recognized as an asset, initially recognized at cost, if, and only if:

- it is probable that future economic benefits associated with the item will flow to the entity; and
- the cost of the item can be measured reliably.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the following:

- the cost of materials and direct labor;
- any other costs directly attributable to bringing the assets to a working condition for their intended use;
- when the Company has an obligation to remove the asset or restore the site, an estimate of the costs of dismantling and removing the items and restoring the site on which they are located; and
- Capitalized borrowing costs.

The Company has adopted revaluation model for Land and Building and cost model for remaining class of property and equipment. Land and Building are measured at restated revalued figure at the date of transition. An annual transfer from the asset revaluation surplus to retained earnings is made for the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost. Additionally, accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation surplus relating to the particular asset being sold is transferred to retained earnings. The remaining items of property and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

Subsequent expenditure is capitalized if it is probable that the future economic benefits from the expenditure will flow to the Company. Ongoing repairs and maintenance to keep the assets in working condition are expensed as incurred. Any gain or loss on disposal of an item of property and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognized within other income in profit or loss.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

B) Depreciation

Depreciation on assets under construction does not commence until they are complete and available for use. Depreciation is provided on all other items of property, plant and equipment so as to write-off their depreciable amount over the expected useful economic lives.

Depreciation is provided on a pro-rata basis on the straight-line method based on the estimated useful life of the assets determined by management as per application guidance to NAS 16 issued by Accounting Standard Board.

The estimated useful lives of various class of PPE for the current year and comparative years are as follows:

Class of PPE	Useful Life
Factory Building	30 Years
Building Other than Factory Building (RCC frame)	60 Years
Building Other than Factory Building (Other than RCC frame)	30 Years
Road Inside Factory	3-10 Years
Furniture and Fixtures	10 Years
Computer and IT Equipments	3-6 Years
Office Equipment	5-10 Years
Vehicles - 4 Wheelers	8 Years
Vehicles - 2 Wheelers	10 Years
Plant and Machinery	15 Years
Server	6 Years

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate

C) De-Recognition

An item of property plant and equipment is de-recognised on disposal or when no future economic benefits are expected from the use of that asset. The gain or loss arising from the disposal of an item of property plant and equipments is the difference between net disposal proceeds if any, and the carrying amount of that item and is recognised in the statement of Profit and Loss.

D) Capital Work in Progress

Capital work-in-progress represents expenditure incurred in respect of capital projects not ready for use and are carried at cost. Cost comprises of purchase cost, related acquisition expenses, development / construction costs, borrowing costs and other direct expenditures.

3.10 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost of acquisition. The cost comprises of purchase price and directly attributable costs of bringing the assets to its working condition for intended use.

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses, if any.

The Company's intangible assets comprises assets with finite useful life which are amortised on a straight-line basis over the period of their expected useful life.

Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

The estimated useful lives of Intangible assets for the current year and comparative years are as follows:

Particulars	Useful Life
Computer Software	5 years

3.11 Investment property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

3.12 Financial Instruments : Financial Assets

Financial Asset is any asset that is:

- a) Cash
- b) an equity instrument of another entity
- c) a contractual right:
 - i) to receive cash or other financial asset from another entity, or
 - ii) to exchange financial assets or financial liabilities with another equity under conditions that are potentially favourable to the entity
- d) a contract that will or may be settled in the entity's own equity instruments and is:
 - i) a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments, or
 - ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments.

A) Recognition

All financial assets are initially recognized on the date on which the company becomes a party to the contractual provisions of the instrument. The classification of financial instruments at the initial recognition depends on their purpose and characteristics and the management's intention in acquiring them.

B) Classification

The financial assets are measured at amortized cost or fair value on the basis of the Company's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

The two classes of financial assets are as follows:

i) Financial Assets Measured at Amortized Cost

Financial asset are measured at amortized cost if both of the following conditions are met:

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

ii) Financial Asset Measured at Fair Value

Financial assets other than those measured at amortized cost are measured at fair value. Financial assets measured at fair value are further classified into two categories as below:

a) Financial Assets at Fair Value Through Profit or Loss (FVTPL)

Financial assets are classified as fair value through profit or loss (FVTPL) if they are held for trading or are designated at fair value through profit or loss. Upon initial recognition, transaction cost is directly attributable to the acquisition are recognized in profit or loss as incurred. Such assets are subsequently measured at fair value and changes in fair value are recognized in Statement of Profit or Loss.

b) Financial Assets at Fair Value Through Other Comprehensive Income (FVTOCI)

Investment in an equity instrument that is not held for trading and at the initial recognition, the Company makes an irrevocable election that the subsequent changes in fair value of the instrument is to be recognized in other comprehensive income are classified as financial assets at fair value through other comprehensive income. Such assets are subsequently measured at fair value and changes in fair value are recognized in other comprehensive income.

C) Measurement

i) Initial Measurement

A financial asset or financial liability is measured initially at fair value plus or minus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issue. Transaction cost in relation to financial assets and liabilities at fair value through profit or loss are recognized in Statement of Profit or Loss.

ii) Subsequent Measurement

A financial asset or financial liability is subsequently measured either at fair value or at amortized cost based on the classification of the financial asset or liability. Financial asset or liability classified as measured at amortized cost is subsequently measured at amortized cost using effective interest rate method.

The amortized cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or uncollectibility.

Financial assets classified at fair value are subsequently measured at fair value. The subsequent changes in fair value of financial assets at fair value through profit or loss are recognized in Statement of Profit or Loss whereas of financial assets at fair value through other comprehensive income are recognized in other comprehensive income.

D) Derecognition

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all the risks and rewards of ownership and it does not retain control of the financial asset.

Any interest in such transferred financial assets that qualify for derecognition that is created or retained by the Company is recognized as a separate asset or liability. On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset transferred), and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognized in other comprehensive income is recognized in profit or loss.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

In transactions in which the Company neither retains nor transfers substantially all the risks and rewards of ownership of a financial asset and it retains control over the asset, the Company continues to recognize the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

E) Determination of Fair Value

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the measurement date. The fair value of a liability reflects its non-performance risk.

When available, the Company measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis. If a market for a financial instrument is not active, the Company establishes fair value using a valuation technique. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, discounted cash flow analyses.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price - i.e. the fair value of the consideration given or received. However, in some cases, the fair value of a financial instrument on initial recognition may be different to its transaction price. If such fair value is evidenced by comparison with other observable current market transactions in the same instrument (without modification) or based on a valuation technique whose variables include only data from observable markets, then the difference is recognized in profit or loss on initial recognition of the instrument. In other cases, the difference is not recognized in profit or loss immediately but is recognized over the life of the instrument on an appropriate basis or when the instrument is redeemed, transferred or sold, or the fair value becomes observable.

All unquoted equity investments are recorded at cost, considering the non trading of promoter shares up to the date of balance sheet, the market price of such shares could not be ascertained with certainty. Hence, these investments are recognized at cost net of impairment, if any.

F) Impairment

At each reporting date, the Company assesses the impairment of financial assets using the Expected Credit Loss (ECL) model as required under NFRS 9. The Company recognizes expected credit losses for all financial assets measured at amortized cost and debt instruments at fair value through other comprehensive income (FVOCI).

Impairment Assessment: The Company assesses financial assets for impairment at both the individual and collective level, taking into account both 12-month ECL for assets with no significant increase in credit risk and Lifetime ECL for assets with a significant increase in credit risk.

Provision Matrix: For trade receivables and other financial assets, the Company uses a provision matrix to estimate lifetime ECL based on historical loss experience and forward-looking economic conditions.

Modelling and Adjustments: In assessing credit losses, the Company uses statistical models that incorporate probability of default (PD), loss given default (LGD), and exposure at default (EAD). The Company also adjusts these estimates for management's judgment, incorporating current and forecasted economic conditions.

Regular Review: Default rates, loss rates, and other assumptions are reviewed regularly and benchmarked against actual outcomes to ensure that the ECL estimates remain accurate and appropriate.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

3.13 Income Taxes

Tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that they relate to items recognised directly in equity or in other comprehensive income.

Current Tax

Current tax is the expected tax payable or recoverable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred Income Tax

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected realization or settlement of the carrying amount of assets and liabilities using tax rates (i.e 12.60%) at the balance sheet date. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

3.14 Inventories

Inventories are carried at the lower of cost or Net realizable value.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and the necessary estimated expenses. The cost of obsolescence and other anticipated losses are also considered for determining the net realizable values.

Cost of finished goods includes the cost of raw materials, direct labor and appropriate proportion of fixed and variable production overheads incurred in bringing the inventory to their present location and condition. Inventories of Raw material are carried at Cost.

In determining the cost of raw materials First In First Out (FIFO) method is used. Cost of inventory comprises of all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities), cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Work in Progress are carried at the Weighted average cost.

In determining the cost of consumables, stores and spares First In First Out (FIFO) method is used.

In determining the cost of Usable Wastages, Weighted Average Cost of Raw Material is used.

Saleable wastages are carried at the Net realizable value.

3.15 Borrowing Cost

Borrowing cost that are directly attributable to the acquisition, construction, or production of a qualifying asset are capitalized as a part of the cost of such asset till such time the asset is ready for its intended use or sale.

Borrowing cost consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs also includes exchange differences to the extent regarded as an adjustment to the borrowing costs. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing cost are recognized as expense in the period in which they are incurred.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

3.16 Cash and Cash Equivalents

Cash and cash equivalents are defined as cash on hand, demand deposits and short term highly liquid investments, readily convertible to known amounts of cash and subject to insignificant risk of changes in value.

For the purpose of cash flow statements, cash and cash equivalents consist of cash in hand and balance in bank accounts.

3.17 Non-current Assets Held for Sale

Non-current assets or disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Such assets or disposal groups are classified only when both the conditions are satisfied –

- a. The sale is highly probable, and
- b. The asset or disposal group is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such assets.

Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification as held for sale, and actions required to complete the plan of sale should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Noncurrent assets or disposal group are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

Upon classification, non-current assets or disposal group held for sale are measured at the lower of carrying amount and fair value less costs to sell. Non-current assets which are subject to depreciation are not depreciated or amortized once those classified as held for sale.

3.18 Employee Benefits

Employee benefits include salaries, wages, contribution to SSF, compensated absences and other terminal benefits.

a. Short-term Employee Benefits

Wages and salaries, including non-monetary benefits that are expected to be settled within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the Statement of Financial Position.

b. Post-employment Benefits

Defined Contribution Plan

The Company has Social Security Fund as defined contribution plan. The obligation of the Company is limited to the amount contributed and it has no further contractual nor any constructive obligation. Therefore, contributions paid and payable under the scheme are recognised in the period when the employee renders the related service.

As per Section 53 of Labor Act, 2074, with effect from Bhadra 19, 2074 (September 04, 2017), Gratuity shall be treated as defined contribution plan to be calculated at 8.33% of Basic Salary and therefore Actuarial Valuation is not required.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

C. Long-term Employment Benefits

Leave Encashment has been computed using Actuarial Assumptions and these are measured at the present value of expected future payments to be made in respect of services provided by employees up to the end of the year using the Projected Unit Credit Method. The benefits are discounted using the market yields at the end of the year that have terms approximating to the terms of assumptions.

Key Assumptions:

The following actuarial assumptions were used in measuring the leave encashment liability:

A. Discount rate: 9% (based on market yields on government bonds).

B. Salary growth rate: 5% (based on historical salary increment trends and expected future salary increases).

During the year, an actuarial gain is recognized in the Profit and Loss Statement due to changes in the actuarial assumptions, primarily related to discount rate or salary escalation.

3.19 Financial Instruments : Financial Liabilities

Financial Liability is any liability that is:

- a) a contractual obligation:
 - i) to deliver cash or other financial asset to another entity, or
 - ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity.

- b) a contract that will or may be settled in the entity's own equity instruments and is:
 - i) a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments, or
 - ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments.

Recognition

All financial liabilities are initially recognized on the date on which the company becomes a party to the contractual provisions of the instrument. The classification of financial instruments at the initial recognition depends on their purpose and characteristics and the management's intention in acquiring them.

Classification

The Company classifies its financial liabilities, other than financial guarantees and loan commitments, as follows:

i) Financial Liabilities at Fair Value through Profit or Loss (FVTPL)

Financial liabilities are classified as fair value through profit or loss if they are held for trading or are designated at fair value through profit or loss. Upon initial recognition, transaction costs are directly attributable to the acquisition are recognized in Statement of Profit or Loss as incurred. Subsequent changes in fair value is recognized at profit or loss.

ii) Financial Liabilities measured at amortized cost

All financial liabilities other than measured at fair value through profit or loss are classified as subsequently measured at amortized cost using effective interest rate method.

Measurement

i) Initial Measurement

A financial asset or financial liability is measured initially at fair value plus or minus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issue. Transaction cost in relation to financial assets and liabilities at fair value through profit or loss are recognized in Statement of Profit or Loss.

Reliance Spinning Mills Ltd.
Significant Accounting Policies and Notes to Financial Statements
For the period ended Poush 29, 2081

ii) Subsequent Measurement

A financial asset or financial liability is subsequently measured either at fair value or at amortized cost based on the classification of the financial asset or liability. Financial asset or liability classified as measured at amortized cost is subsequently measured at amortized cost using effective interest rate method.

The amortized cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or uncollectibility.

3.20 Provisions

Provisions are recognized when the company has a present obligation, legal or constructive, as a result of a past event, it is probable that a transfer of a economic benefits will be required to settle the obligation and when reliable estimate can be made of the amount of obligation. If these conditions are not met, no provision is recognized.

The amount of provision recognized is the management's best estimate of expenditure required to settle the present obligation at the reporting date.

Management reviews provisions at each reporting date and is adjusted to reflect the best estimate. If it is no longer probable that a transfer of economic benefits will be required to settle the obligation, the provision is reversed.

3.21 Contingent Liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

The Company records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its financial statements, if material. For potential losses that are considered possible, but not probable, the Company provides disclosure in the financial statements but does not record a liability in its accounts unless the loss becomes probable.

3.22 Earnings Per Share

The Company presents basic and diluted earnings per share (EPS) data for its ordinary shares. The basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

Property, Plant & Equipment have been mortgaged/hypothecated against Bank Borrowings.

All categories of Property, Plant and Equipment are initially recorded at cost. Property, Plant and Equipment except Land & Building are subsequently measured at historical cost less depreciation and impairment losses. Historical cost includes expenditure. Subsequent cost are included in the assets carrying amount or recognised as separate asset, as appropriate, only when it is probable that future economic benefits are associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

The rates have been applied consistently over the years. The assets residual values and useful lives are reviewed and adjusted if appropriate, at each reporting period. An asset's carrying amount is written down immediately to its estimated recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and Losses on disposal of property and equipment are determined by reference to their carrying amount and are included in profit or loss.

23.1 Provisions

Provisions are recognized when the company has a present obligation, legal or constructive, as a result of a past event, it is probable that a transfer of a economic benefits will be required to settle the obligation and when reliable estimate can be made of the amount of obligation. If these conditions are not met, no provision is recognized.

The amount of provision recognized is the management's best estimate of expenditure required to settle the present obligation at the reporting date.

Management reviews provisions at each reporting date and is adjusted to reflect the best estimate. If it is no longer probable that a transfer of economic benefits will be required to settle the obligation, the provision is reversed.

24.4 The Company has approved the issuance of 1,926,600 equity shares through an Initial Public Offering (IPO) using the Book Building Method. A portion of this IPO, totaling 40%, or 770,640 equity shares, has already been issued to Qualified Institutional Investors (QII) at NPR 912 per share. This amount is reflected in "Other Financial Liability (Current)" due to its contingent nature, as the public issue process is still pending.

The Company filed its Prospectus with the Securities Board of Nepal (SEBON), and SEBON approved the prospectus on 2081/03/12. However, the IPO process was temporarily halted. Further information has been provided in Note 42 of these financial statements.

33 Income Tax

Tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that they relate to items recognised directly in equity or in other comprehensive income.

A) Current Tax

Current tax is the expected tax payable or recoverable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

B) Deferred Tax

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected realization or settlement of the carrying amount of assets and liabilities using tax rates at the balance sheet date.
